

## LEAF SERIES PINOT NOIR

### **Vintage**

*Good winter rainfall resulted in an excellent back-up to the previous vintage, delivering varietal definition and fruit intensity evident, in this Pinot Noir from Pemberton.*

### **Winemaking**

*555 clone Pinot Noir sourced from the Porongurup sub-region was passed [over](#) the sorting table to remove any damaged berries and then crushed into stainless steel to be fermented dry and then developed in one and two year old French barrels for nine months.*

### **Tasting Notes**

*Classic aromas of “forest floor” and ripe berries precede a palate that is light but layered with flavour, the nuances of which will further develop with time. Primary fruit characters include [raspberries](#) and cherries and the wine is balanced with fine tannins in the finish. Alcohol 13.5%*
